Section 3: Automated Exception & Anomaly Analysis

- **Exception Diagnostic:** `The post-service claim did not include the itemized hospital bill listed in the required-document checklist.`
- **Defect Classification:** `missing_billing_document`
- **Automated Decision Logic:** High-dollar claim ($> \$25,000$) mandates itemized revenue code ledger. Extraction checklist flags `itemized_hospital_bill` as absent. Confidence score $0.97 \ge 0.95$. `manual_review_required: False`.
- **Zero-Inference Guardrail:** Revenue code charges cannot be decomposed from aggregate DRG claim lines.

Section 4: Resolution & Reviewer Audit Record

- **Approved Resolution:** Request the missing itemized hospital bill from the facility billing department.
- **Supporting Evidence Rationale:**

> *"Synthetic checklist shows the itemized bill was absent; resolution is to request it."*

- **Remediation Trigger:** Automated EDI 277 Claim Acknowledgment & Request dispatched:

> *"Claim #CLM-2026-118492 pended under Code RFI-ITEM-01: Inpatient hospital claims exceeding $25,000 require an itemized breakdown of pharmacy, supply, and room/board charges."*\n
