SYNTHETIC DOCUMENT PACKET: INS-H103

System Case ID: INS-H103

Domain: Healthcare Prior Authorization

Authorization Phase: `PRE` (Prior Authorization Request)

Document Type: `authorization_request_and_policy_record`

Lifecycle Status: Resolved

Sensitivity Classification: Standard (sensitive_case: False)

Assigned Action: `propose_field_correction`

Missing Target Field: None (Data Mismatch)

Evidence Reference: `synthetic_history_INS-H103_request;synthetic_history_INS-H103_policy`

Model Confidence Score: `0.94`

Manual Review Required: `True` (Discrepant Demographic Verification Protocol)

Section 1: Case & Service Overview

- **Transaction ID:** PA-2026-44102
- **Member Policy ID:** GRP-88192-01
- **Service Requested:** Outpatient Laparoscopic Cholecystectomy (CPT 47562)
- **Provider:** Tri-County Surgical Associates

Section 2: Dual Source Evidence Comparison

```
+-------------------------------------------------------------------------------------------
----------+
| SOURCE COMPARISON MATRIX
|
| Field Attribute           Source A: Auth Request (278 Payload)    Source B: Master Policy
DB       |
+-------------------------------------------------------------------------------------------
---------+
| Policyholder First Name   Jonathan                                John
|
| Policyholder Middle Name  Robert                                  R.
|
| Policyholder Last Name    Davies                                  Davies-Smith
|
| Date of Birth             03/14/1982                              03/14/1982
|

Section 3: Automated Exception & Anomaly Analysis

- **Exception Diagnostic:** `The policyholder name on the authorization request differed from the name on the synthetic policy record.`
- **Defect Classification:** `policyholder_mismatch`
- **Automated Decision Logic:** Exact DOB and Member ID match confirm same underlying individual, but last name differs (unhyphenated `Davies` vs hyphenated legal surname `Davies-Smith`). Confidence score 0.94.
- **Non-Destructive Guardrail:** Strict prohibition against automated silent overwrite. `manual_review_required: True`.

Section 4: Resolution & Reviewer Audit Record

- **Approved Resolution:** Propose a field correction to align the authorization policyholder name with the master policy record after source verification.
- **Supporting Evidence Rationale:**

> *"The two synthetic sources disagree on the policyholder name; resolution proposes a correction only after source verification."*

- **Remediation Trigger:** Proposal submitted to Member Eligibility Team: Confirm legal name change or hyphenation with provider office; update auth record to match authoritative Enterprise Master Member

Index (`John R. Davies-Smith`).\n
