SYNTHETIC DOCUMENT PACKET: INS-H106

System Case ID: INS-H106

Domain: Healthcare Special Investigations & Compliance

Authorization Phase: `POST` (Post-Service Claim & Invoicing)

Document Type: `claim_and_invoice_bundle`

Lifecycle Status: Resolved

Sensitivity Classification: Elevated Risk (`sensitive_case: True`)

Assigned Action: `abstain`

Missing Target Field: None (Integrity & Arithmetic Inconsistency)

Evidence Reference: `synthetic_history_INS-H106_claim;synthetic_history_INS-H106_invoice`

Model Confidence Score: `0.35`

Manual Review Required: `True` (Quarantine to Special Investigations Unit / SIU)

Section 1: Claim Bundle Overview

- **Claim Identifier:** CLM-2026-F99201
- **Provider Group:** Apex Ambulatory Surgical Center
- **Patient / Member ID:** MEM-99104
- **Submitted Claim Form:** CMS-1500 & Itemized Vendor Invoice Bundle
- **Claim Level Indicator:** Flagged by Forensic Document Analysis (FDA) Module

Section 3: Automated Exception & Anomaly Analysis

- **Exception Diagnostic:** `The claim contained potentially altered invoices and inconsistent billing totals that required human investigation.`
- **Defect Classification:** `suspected_fraud`
- **Automated Decision Logic:** Internal mathematical inconsistency combined with structural artifacting on the submitted invoice. Confidence score 0.35. `sensitive_case: True`.
- **Presumption of Integrity Guardrail: The system strictly ABSTAINS from automated adjudication.** System records do NOT declare the submitter guilty of fraud or assert fraud as an established legal fact; the bundle is neutrally escalated for human forensic investigation.

Section 4: Resolution & Reviewer Audit Record

- **Approved Resolution:** Automation abstained; referred the case for specialized human investigation without asserting fraud as fact.
- **Supporting Evidence Rationale:**

> *"Synthetic records showed inconsistent invoice totals; automation abstained and referred the case for human investigation without asserting fraud as fact."*

- **Remediation Trigger:** Case quarantined and escalated to Special Investigations Unit (SIU) via Workflow `SIU-ESC-2026-0044`. Automated claims adjudication halted immediately.\n
